

## **Refrigeration industry: efficient solutions for food and processing industry – 2025**

The seventh conference "Refrigeration industry: effective solutions for the food and processing industry" will be held **on October 1 from 10:00 to 14:00, as part of the Agropromash 2025 exhibition in the Crocus Expo International Exhibition Center (pavilion 3, hall 15, conference hall No. 1).**

Leading refrigeration companies will tell you how to reduce costs and increase the efficiency of refrigeration equipment at your enterprise, and will also share successful cases.

The conference will be useful for representatives of the food industry and agriculture, wholesale and retail trade.

The event will consider issues of selecting and operating refrigeration equipment at industrial refrigeration facilities: food production facilities, warehouses, stores with centralized refrigeration systems.

### **Conference Topics**

- Current and upcoming legislative restrictions of the Russian Federation on the use of substances regulated by the Montreal Protocol used in refrigeration equipment
- Possibilities of switching to natural refrigerants (ammonia, carbon dioxide, hydrocarbon refrigerants) in various sectors of refrigeration equipment application
- Technical solutions of refrigeration companies on the transition to natural refrigerants
- Possibilities of training personnel to work with new technologies
- How to reduce capital costs for refrigeration and air conditioning systems
- New products and technologies of refrigeration equipment manufacturers
- Successful projects in the field of import substitution of refrigeration supply for agricultural facilities
