

## The Forum on Ingredients: Made in Russia

The event programme encourages discussions of the current state and development of the main segments of the Russian ingredients market, the main trends and forecasts until 2030, prospects for the development of the investment potential of Russia, government support measures for the strategy of import substitution and the technological sovereignty of economic sectors, the main trends and tools for the development of domestic production and the restoration of the potential for deep processing of agricultural products and biotechnologies, and problems related to management and implementation of business activities in the ingredients industry.

The event is expected to be attended by representatives of Russian federal and regional executive authorities, heads of large manufacturing enterprises, agriculture experts, and representatives of development institutions.

The focus is on

- development trends of the food ingredients market,
- support measures and development tools,
- industry mapping,
- myths and reality of domestic production (characteristics by main ingredients segments).

The forum pays special attention to the issues of raw materials localization and market saturation with ingredients produced in Russia, information on investment projects with a high degree of readiness, what ingredient segments are expected to be launched by 2030, and expert assessment of the main segments.

Today, the development of this niche segment is a key to the sustainable functioning of the whole food industry, and the main task in achieving the goals of technological sovereignty in the field of food security.

The tasks of raw material localization are now faced by all food manufacturers. One needs to have insider information to know exactly who and where makes ingredients that one requires.

An expert assessment of the state and trends in the main ingredient segments will help food manufacturers better navigate the world of innovation and new technological solutions for various industries.

There will be a lot of relevant and high-quality content, discussions on the development of the ingredients industry, an analysis of changes in market conditions over the past five years, and a look into the future.
